

The background is a stylized botanical illustration. It features various green leaves and branches in different shades of green. There are two small brown pomegranates with 'X' marks on them in the top left. A large, light green abstract shape with a small green circle inside is in the top right. In the bottom right, there's a large green apple-like shape with two dark green leaves. The overall style is modern and clean.

FUTURE WORKS

Introduction

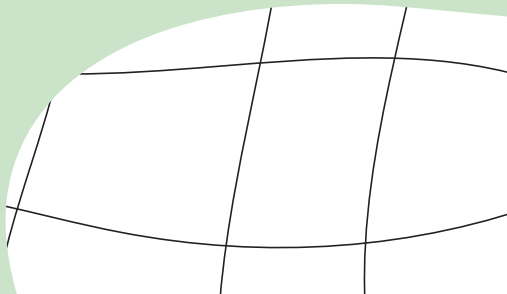

01

An illustration on the left side of the slide shows a hand with dark skin holding a glass filled with a light-colored beverage, ice cubes, and two lemon wedges. Several green leaves are floating around the glass. The background is a solid light green color with some faint white line art of leaves and a brown shape in the top right corner.

MyMeals App

For users that want to keep track of what they eat
and want recipe recommendations.

A white plate with a black grid pattern is partially visible in the bottom right corner of the slide.

MyMeals App Features

Dashboard

Main screen where consumed meals are shown.

Analyze data and trends

Screen containing nutrient data and charts

Look for and Analyze recipes

Look for a recipe or analyze one

Insert a new meal

Insert a new meal either manually or using a barcode

Recipe Screen

Casual

Recommendations based on time of the day and main ingredient

Look for a recipe

The user can look for a recipe based on macrogroups

Random

Recommendations based only on time of the day

Healthy

Recommendations based on time of the day, main ingredient and maximum calories

Country of origin

Recommendations based on country of origin

UX/UI Design

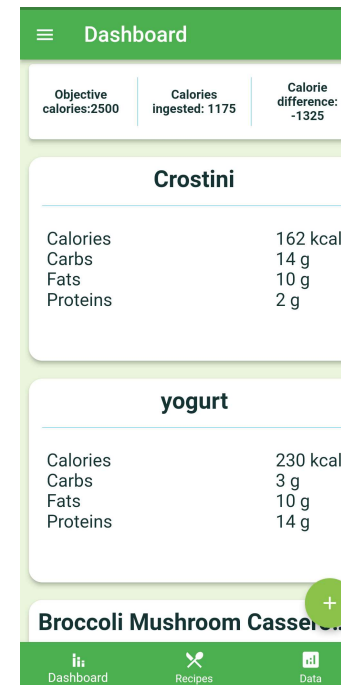

02

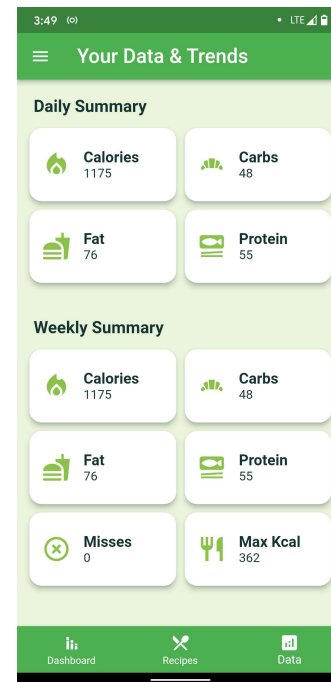

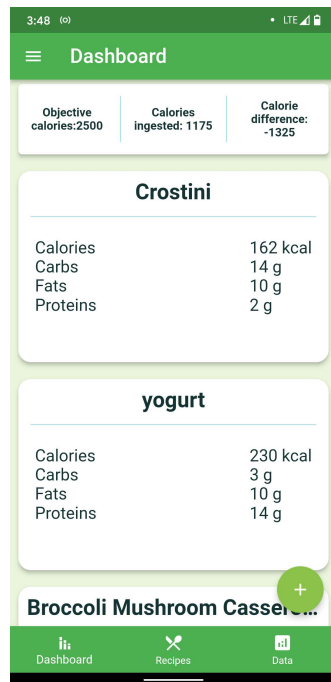

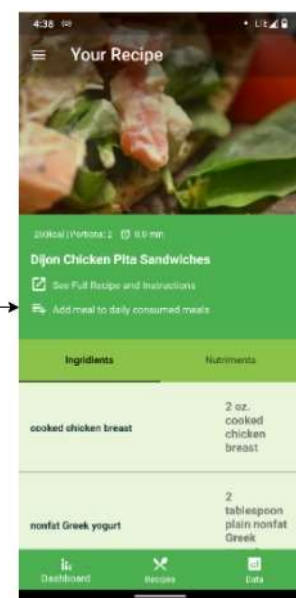

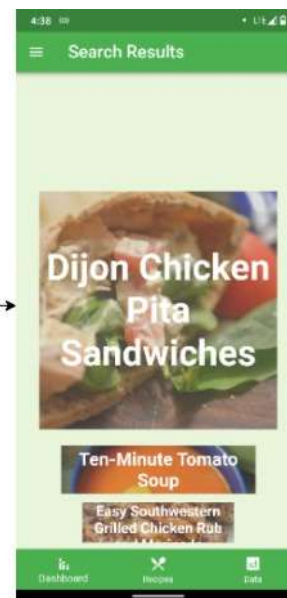

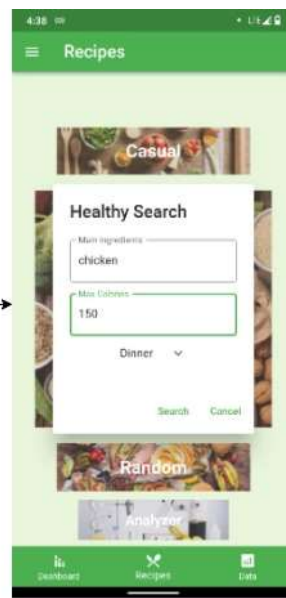

UI / UX DESIGN

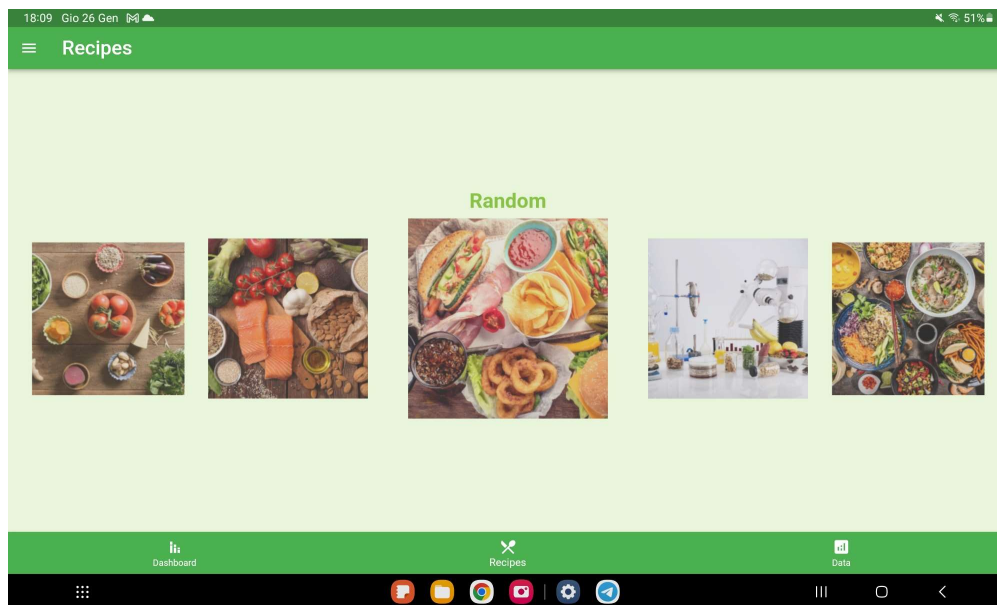

We decide to split the application in three screens:

- Dashboard screen (main)
- Recipe screen
- Data Screen (values and charts)

Tablet implementation:

- Horizontal scroll
- No hard coded parameters
- Dynamic parameters using the MediaQuery class

Implementation 03

PROJECT POLICIES

Modular Development

Separating functionalities into interchangeable modules

Code Smells prevention

Avoid duplicates
Validated merge/pulls requests

Strict Project Structure

Each dart file has only one widget, located in the right folder

Variable Naming Convention

UpperCamelCase,
snake_case, lowerCamelCase

Git

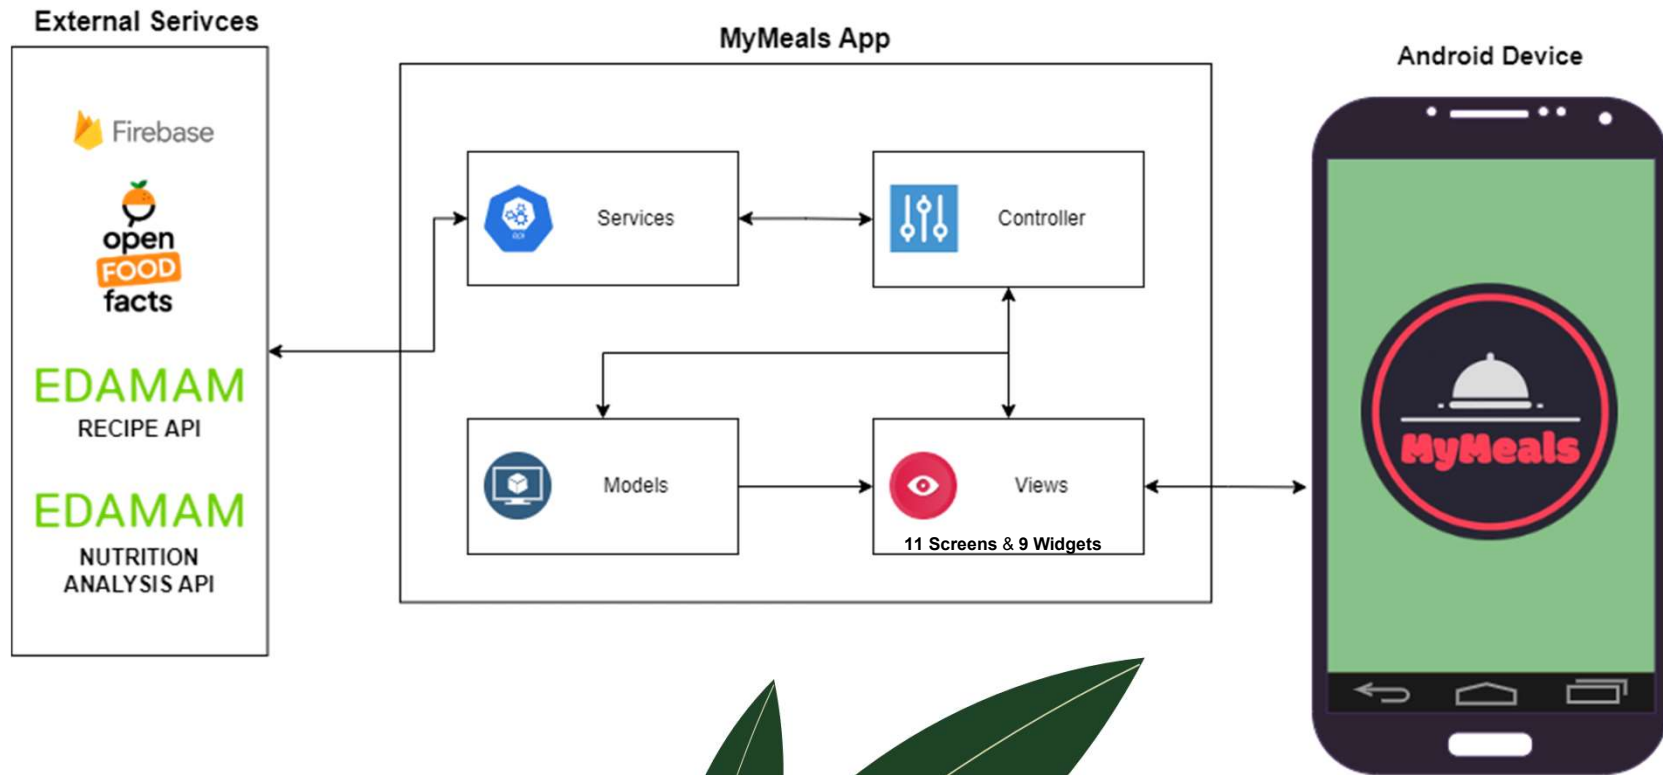

Branch usage and
proper git etiquette

Null Safety

a variable cannot have a
null or void value

High Level Architecture

, and screens

6 covered

d during testing

Integration Testing

- UT does not test how app components work together
- Simulate a user's app usage scenario
- End-to-end scenario: from register to data trends

User Acceptance Testing

- UX assessment
- Visualize user interactions
- Validate the behavior of the app
- 3rd party input

Future Works

05

What's Next ?

- Implementing the tracking of more nutrients
- Support for allergies
- More filters and personal preferences
- Improvement of the recipe services
- Implementing suggestions and insights to the user's diet
- Improve IOS support
